PROFILE SUMMARY

Passionate Frontend Developer with experience building responsive web apps using React.js, JavaScript (ES6+), Tailwind CSS, and React Router. Skilled in creating reusable components and clean UI. Familiar with Node.js, Express, MongoDB, REST APIs, and Git workflows. Committed to continuous learning and delivering impactful user experiences.

PROJECTS

Tutor Lingo

Frontend Developer

- Built a full-stack web app where users can publish and book tutorials.
- Implemented dynamic routing using React Router (data API mode).
- Used Firebase Authentication for secure user login/signup.
- MongoDB used for storing tutorials, users, and bookings.
- Deployed using Vercel and Render.

Recipe Haven

Frontend Developer

- Conducted market research to identify emerging trends and consumer preferences, providing valuable insights for product development and positioning.
- Oversaw the creation of engaging content for various platforms, collaborating with internal teams and external agencies to ensure brand consistency and relevance.

BloodBank BD (Project in progress)

Frontend Developer

- Collaborated with a team to build a full-stack Blood Bank platform; focused on developing the frontend using React.js and Tailwind CSS.
- Designed and implemented user-friendly interfaces for donor registration, login, and donation scheduling with protected routes.
- Integrated data from backend APIs using TanStack Query, ensuring responsive performance and seamless user experience.
